

# VIRAL PATHOGENESIS AND EVOLUTION

University of Zurich-Irchel, Lecture Hall Y16-G-15

April 12, 2013, 14:00 – 18:00

## *Program*

14:00 Welcome (Alexandra Trkola, Urs Greber, Otto Haller)

---

### **Session 1 Chair: Alexandra Trkola, Zürich**

---

14:10 **Gabriella Campadelli-Fiume**, Bologna  
Herpes Virus Signaling in Cell Entry: Integrins as a novel class of sensors

14:40 **Esteban Domingo**, Madrid  
Quasispecies and lethal mutagenesis: recent results with hepatitis C virus

15:10 **Ben Berkhout**, Amsterdam  
Recent advances in fundamental and applied HIV-1 research

15:40 **Paul Duprex**, Boston  
Virus eradication is a redundant concept

---

16:10 – 16:30 Coffee break

---

### **Session 2 Chair: Urs Greber, Zürich**

---

16:30 **Santo Landolfo**, Turin  
Restriction Factors to Human Cytomegalovirus

17:00 **Noël Tordo**, Paris  
Lyssavirus evolution and new tools to control rabies

17:30 **Richard M Elliott**, Glasgow  
Schmallenberg virus, an emerging orthobunyavirus in Europe

18:00 **Concluding remarks: Giorgio Palu**, Padova
